LINUX

Life Sciences Pvt. Ltd

LINUX Laboratories is the fastest growing company among the top 10 CNS players in the country. Our success and growth are attributed to over 400 strong multicultural Strategic workforces from all over the nation. **LINUX Life Sciences** has a deep-rooted commitment to meet the needs in medical care. At the heart of our business commitment is our responsibility to remain ingrained in our purpose of making a difference by providing affordable quality medicines, particularly in areas of unmet needs. To fulfil our commitment we have acquired 191 licenses for export apart from a comprehensive 391 domestic licenses spread across specialties.

Linux life Sciences is a WHO-GMP and PICS compliant pharmaceutical facility engaged in the manufacturing of Nutraceuticals, Creams, ointments and Topical formulations. Our plant is located at approximately 20 kilometers south of Pondicherry city

Unit A is a pharmaceutical finished dosage formulations unit. It is fully designed and equipped to manufacture various oral solid dosage forms like Tablets, Capsules and Dry syrups for general category.

Unit B which has a separate block is dedicated for manufacturing Nutraceuticals products. It is fully designed and equipped to manufacture various oral solid dosage forms like Tablets, Capsules and Dry syrups.

Linux Life Sciences is committed to implementing a robust global quality management system based upon the desire to sustain a culture of operational excellence. Meeting and exceeding stakeholders' expectations, including marketing companies, patients and Government regulators are the guiding lights to our progression.

Linux Life Sciences has a team of qualified and dedicated personnel at all levels of Manufacturing, Quality Control, Quality Assurance, Maintenance and Stores.

In **Linux Life Sciences** our innovations are driven by a strong philosophy of producing advanced and novel products for unmet patient needs. Our conscious efforts are towards bringing access to highest quality health care products and touching lives of humans. Our production team take steps to ensure the manufacturing process strictly follows as per cGMP guidelines which include equipment / process validation and provide detailed and complete documentation for consistent product quality.

Linux Life Sciences makes continuous investments in up gradation of manufacturing facilities with special emphasis on deploying advanced machinery and adopting latest technologies. Besides enabling us to consistently produce high quality medicines at an affordable cost.

It is these advantages that give us the confidence to partner with all leading pharmaceutical companies.
